

About Us

VHC Medical Brigade has been working since 1999 to bring transformational health and development to the most vulnerable in Honduras. We empower communities to solve their challenges, provide life-changing surgeries and health technology solutions, and invest in building a robust Honduran medical system. Sustainability, community contribution, and a focus on empowering the vulnerable are integral to everything we do.

Making an IMPACT for Over 20 Years

The VHC Medical Brigade is a 501(c)(3) nonprofit organization.
Federal ID #37-1659721

VHC Medical Brigade

Empowering Hondurans to Build
Healthier Communities

Bringing health and sustainable development to those who need it most.

Honduras is one of the poorest countries in Latin America, with almost half of all Hondurans living in poverty.

- 1 in 4 children in Honduras are malnourished.
- 2.5 million Hondurans lack adequate access to clean water, with 1.3 million in critical need.
- Honduras has one of the lowest numbers of doctors per person in the world.

Our Programs

✓ Community Development

Communities are empowered through access to clean water, health and hygiene education, school nutrition, and leadership training.

✓ Health Services

The most vulnerable receive first-class health services including surgery, eye care, and rehabilitation therapy. Access to services is expanded by the construction of rural health clinics and training for volunteer community health workers.

✓ Health System Strengthening

The quality of national and local health care systems is improved through training and support, telehealth and technology solutions, medical supplies and equipment, as well as equipment repair.

Our Vision

Healthy families and communities in Honduras.

Our Mission

Empowering Hondurans to bring health and sustainable development to the most vulnerable.

Our Approach

We work through local partners, empowering communities and individuals to develop sustainable solutions.

Connect With Us

The Brigade relies on volunteers for every aspect of our work. Learn more about how you can make a difference!
